

PRELYTIS LiveDashboard4Team, the BI solution in the « cloud », now includes free connection to Amazon© RDS

LiveDashboard4Team is the hosted version of the Business Intelligence suite PRELYTIS LiveDashboard. This innovative solution now offers access to cloud databases service Amazon© RDS.

LiveDashboard4Team users can now connect their business intelligence environment to their data sources located in the Amazon© Cloud. In a few clicks, they build their first data dictionaries and dashboards in real time without any installation and without hardware nor software investment.

The advantages are twofold:

- Data are stored into a recognized Amazon© EC2 infrastructure
- Companies have a complete Business Intelligence in real Cloud Computing mode, from a simple browser without any installation or plug-ins, or even flash.

Registration only takes few seconds on the site www.livedashboard4team.com. Among the many video tutorials available, users will find the step by step explanations to connect to the cloud services Amazon© RDS on our YouTube channel:

<http://www.youtube.com/watch?v=JnCgnTt1Skw>

Free, the hosted solution LiveDashboard4Team is aimed to start in a few days a collaborative dashboards project for a large number of users. Training services and technical support are optionals.

For companies who want to go further, PRELYTIS LiveDashboard Enterprise can be installed on their own premises, on a private cloud or on the Amazon© EC2 platform. In this case, pricing will be based on the number of users or the number of indicators for unlimited users.

Through its multi-tenant 100% Web architecture and a 100% HTML interface (even for dashboard creation and administration) LiveDashboard is one of the very few business intelligence technology actually thought for the cloud.

"The technological choice that we've done there 8 years ago, now positions us as the BI solution in the era of "Cloud". Our clients can achieve agile business intelligence and collaborative projects for the lowest TCO (Total Cost of Ownership)"

Alexander Schneider, CEO of PRELYTIS

About PRELYTIS
