

Prelytis LiveDashBoard : the first Business Intelligence solution on Apple iPad®

Prelytis, new generation Business Intelligence software vendor, confirms its innovative market position and its mobility expertise in professional situation by proposing the first Business Intelligence solution compatible with the new Apple iPad®.

The iPad® is a real revolution in mobile devices market and define a major technology edge in the usage of softwares for professionals. In this context, Prelytis LiveDashBoard offers the first Business Intelligence application fully adapted to the specificity of this brand new mobile device. From the administrator to the dashboard and indicators designer, from the manager to the simple user, LiveDashBoard on Apple iPad® enables users to use the Multi-Touch experience developed by Apple for displaying and analysing their business indicators.

You can use all the features of LiveDashBoard at your finger tips : indicators display, navigation but also dashboards and kpi design. LiveDashBoard proposes zoom features, drag&drop, contextual menus, drill-down, click-over preview of indicators, etc. for a unique touch experience on interactive business dashboards.

In the mobile devices time and usage convergence, Prelytis LiveDashBoard is the only one technology allowing to access to a collaborative Business Intelligence environment whatever the device you are using and your profile. First and only one Business Intelligence web 2.0, Prelytis LiveDashBoard offers to its customers a environment multi-platform, multi-OS with a unique setup and deployment simplicity.

Alexandre SCHNEIDER, Prelytis CEO : « The compatibility of our solution with the majority of mobile devices is a key strength for Prelytis since its creation. We are proud to be able to propose to our 100,000 users this perfect compatibility with the Apple iPad®. »

A video will be available on Prelytis YouTube channel in the next few days : www.youtube.com/prelytis
