

Esterel Technologies and Prelytis Announce Partnership For Live Dashboard Application Development

Dashboard will visually connect application developers and management allowing for greater monitoring of the development process

Elancourt, France and Boston, Massachusetts — November 8, 2011— Esterel Technologies, the leading worldwide provider of model-based development solutions for critical systems and software, and Prelytis, a new generation Business Intelligence software vendor, today announced a collaboration to create live dashboards for SCADE® users.

Prelytis, with partners in more than 15 countries and over 100,000 daily users, is the number one independent software vendor focused on collaborative business dashboards and has released the first 100 percent Web 2.0 interface on the market. By joining forces with Prelytis, Esterel Technologies will be able to provide SCADE users with key business intelligence metrics and functionality, including:

- defining metrics for project management, quality and safety assessment and model design purposes;
- extracting and collecting data and providing the ability to customize the data; and
- displaying graphics through customizable dashboard via any internet-based device.

The partnership means that developers of both mission and safety-critical applications and critical embedded graphics displays will benefit from new Application Lifecycle Management capabilities..

“We are pleased to partner with the premier business intelligence dashboard vendor, Prelytis, to create product offerings that will enhance the lifecycle and functionality of our customers’ product development cycles,” said Eric Bantegnie, President and CEO of Esterel Technologies. Prelytis leads the marketing in dashboard development software application, just as Esterel Technologies does for critical system and software development.

“We are proud to partner with Esterel Technologies and to provide agile and interactive business dashboards for driving product lifecycles in real time,” states Alexander Schneider, CEO of Prelytis.
